## SUMMARY

Front-end software engineer with two years of experience, with five additional years of experience as Flutter engineer. Track record of completing successful projects across various industries including e-commerce, streaming, finance, and social media. Experience in the Agile environment. Strong understanding of SOLID principles.

## LANGUAGES | FRAMEWORKS | TOOLS

Java, JavaScript, TypeScript, Dart | React, Spring Boot, Flutter | MongoDB, MySQL

## EXPERIENCE

### Language Learning Pronunciation App — LaunchCode Capstone Project

- Developed a full-stack web application that helps language learners improve pronunciation and listening skills through audio practice, transcription exercises, and peer feedback.
- Built RESTful APIs using Spring Boot to support user recordings, feedback, and progress tracking
- Developed a React frontend with JavaScript for recording playback, listening exercises, and user interaction
- Designed and implemented a MySQL database schema to store users, audio metadata, feedback, and practice results
- **Full Project Tech Stack:** Java, Spring Boot, JavaScript, React, MySQL

### Kitchen Designer — USA Cabinet Store, St. Louis

October 2024 - April 2025

- Designed custom kitchen layouts using client requirements, space constraints, and budget considerations, delivering 5–10 complete designs per month
- Consulted with clients to translate functional needs into detailed cabinet, countertop, and layout solutions, maintaining high customer satisfaction and repeat business
- Measured spaces, reviewed floor plans, and ensured design accuracy to reduce installation errors and rework
- Utilized design software and detailed specifications to produce accurate quotes and material lists

### Flutter Software Engineer — Kamion (YC S22)

May 2023 - Feb 2024

- Planned and built Kamion, an ‘Uber for Trucks’ app, from scratch, using Flutter-Dart and following SOLID, TDD, and OOP principles.
- Implemented CI-CD, unit and integration testing and documentation for Kamion, which significantly boosted development productivity
- Implemented MVVM architecture using Provider and GetIt
- Implemented custom UI behaviors in Flutter

## EDUCATION

**LaunchCode**, Course Focus, Year of Graduation

**Sakarya University**, B.S, Computer Science
